

Sporting License Expiration Dates

Agents,

Please note that there has not been any change to the need for a sporting license or has there been an extension of expiration dates on these licenses. While we understand that most agents are not available to perform these transactions, customers can order or renew through our call center or online. When ordering through our call center (1-866-933-2257, M-F, 8:30-4:30), customers will be given their transaction number which they can write down and take with them and use as a license or registration when freshwater or saltwater fishing, respectively. If licenses are ordered online, customers have the option to have a license sent by mail and/or, in the case of fishing licenses and trapping licenses, to print it themselves immediately. Customers still have the option to write down their transaction number for a freshwater fishing license and a marine registry when buying online. If there are any changes to this procedure, DEC will make an official announcement, and we will send a message directly to our agents via DECALS & GovDelivery. If you have not signed up for GovDelivery please do. Sign up is available through the Agent Help Link in the Important Info folder.

Thanks, and we appreciate your cooperation.
